eFUEL 2000W Power Supply

Introduction

Thank you for choosing the eFUEL 2000W, 55A AC/DC Switching Power Supply.

eFUEL 2000W is a high-power AC/DC switching power supply that converts household AC—either 100–120 V or 200–240 V—into an adjustable DC output ranging from 8 V to 36 V, delivering up to 55 A of continuous current.

With excellent thermal control and multiple protection mechanisms, it ensures efficient, stable, and safe operation. Whether in a workshop or a professional testing environment, the eFUEL provides reliable power support.

The DC output port has been upgraded from banana connectors to XT90 battery connectors, making it safer and more convenient to charge popular battery types while reducing the risk of reverse polarity.
